EDUCATION

University of Mindanao **Philippines, Davao City**
Bachelor of Science in Computer Engineering | 2019 - 2026

- Studied the integration of hardware and software systems, including digital electronics, embedded systems, programming, networking, and computer architecture, with hands-on experience in designing and developing real-world tech solutions.

Lafilipina Senior High School **Philippines, Tagum City**
Science, technology, engineering and mathematics (STEM) | 2017 - 2019

- Graduated with a cumulative GPA of 3.9 / 4.0, equivalent to a 94% general average.

WORK EXPERIENCE

Educolor Press (educolorpress.com)
CMS Developer (Remote) | July 2026 - Present | CA

- Developed a **WordPress/WooCommerce** e-commerce site selling digital educational books, supporting **product variations**, **subscriptions**, and **digital downloads.**
- Built custom page sections using **HTML/CSS/JS** within **Elementor Containers** instead of default widgets, for greater design control and easier maintenance.
- Created a **custom PHP-based product description system** (via **WPCode**) to override WooCommerce's default template and give each product a unique layout.
- Configured secure checkout and recurring billing (**WooCommerce Subscriptions**, **WooPayments**, **Authorize.Net gateway**) and implemented **on-page SEO with Rank Math** (meta tags, schema markup).

Impossible Kids Foundation (impossiblekids.ca)
CMS Developer (Remote) | May 2026 - July 2026 | CA

- Designed and developed a fully responsive nonprofit website from concept to launch using **WordPress** and **Elementor Pro**.
- Configured **on-page SEO with Rank Math** — meta titles/descriptions, Open Graph & Twitter Card tags, canonical URLs, and robots directives to maximize organic search performance.
- Integrated **Zeffy** donation platform and mailto-based CTA funnels for sponsorship/partnership inquiries.

LearnEduColor (learneducolor.com)
CMS Developer (Remote) | March 2026 - May 2026 | CA

- Developed an online learning platform for children using **WordPress** and **Tutor LMS Pro**, featuring courses, lessons, quizzes, and student progress tracking across 4 themed **Learning Zones**.
- Built custom page sections using **HTML/CSS/JS** within **Elementor Containers** instead of default widgets, for a modular, easy-to-maintain UI across the **Home**, **Dashboard**, and **Student Portal** pages.
- Configured **subscription plans and billing cycles** through Tutor LMS, integrated **Stripe** for secure payment processing, and implemented **on-page SEO with Rank Math** (focus keywords, meta descriptions, structured URLs) across courses and pages.

Cloudline Technologies Inc (createlabz.io)
IoT / STEM Engineer Associate | Oct 2025 – June 2026 | Philippines

- Assisted in deploying scalable IoT solutions that connected edge devices to cloud platforms, enabling real-time data analytics and enhanced operational visibility.
- Developed and maintained the **createlabz.io** B2B website using **WordPress (Elementor), WooCommerce, Oitech theme, and custom code (HTML, CSS, PHP)**, delivering a responsive, conversion-focused platform for business-to-business operations and client engagement.

C & L Physiotherapy Clinic **Australia**
Zoho CRM | CMS Developer (Remote) | Aug 2021 - Feb 2023 | AU

- Built and optimized the clinic's **WordPress site** on Bluehost, ensuring high uptime, fast performance, and SEO visibility.
- Developed **custom WordPress plugins** and tailored clinic-specific functionalities to improve patient engagement.
- Optimized **Zoho CRM workflows, automation rules, and custom fields**, cutting manual processes and boosting operational efficiency.
- Conducted **SEO audits** using Google Search Console & ChromeDev, driving higher search rankings and stronger online presence.

Remotask **Remotask Flatform**
Super Reviewer | Feb 2019 - July 2020

- Reviewed and validated **autonomous vehicle 3D LiDAR data annotations** with precision and compliance.
- Maintained high accuracy standards, directly contributing to safer and more reliable machine learning datasets.

SOFTWARE DEVELOPMENT PROJECTS

- **GadgetPay Installment Sales System -** Developed in VB.NET with MySQL, featuring user registration, loan tracking, and admin dashboard for lending.
- **Lost and Found System – UM Matina -** Built in C++ with MySQL, featuring login, search, and admin dashboard for lost-and-found management.
- **Recreated the Lost and Found System – UM Matina -** Rebuilt in Java using OOP principles with MySQL backend, improving modularity, UI, and data management.
- **Pawlitrax™ -** Mobile app using Flutter, PHP, and MySQL to monitor cat litter and automate cleaning via AI and utilize third party hardware raspberry pi to connect and send weight data to Pawlitrax mobile app via API with Python.
- **My Website Portfolio -** Responsive React app with Tailwind and localStorage CRUD, deployed on Vercel for fast client-side performance.

KEY PROJECTS

- **GadgetPay Installment Sales System** – Built in **VB.NET + MySQL** with loan tracking, user registration, and admin dashboard.
- **Lost & Found Management System (UM Matina)** – First version in **C++ + MySQL**, later rebuilt in **Java OOP + MySQL** with better modularity, UI, and database handling.
- **Pawlitrax™ Smart Litter Box App** – Developed in **Flutter + PHP + MySQL** with Raspberry Pi & Python API integration. Uses AI/Computer Vision for real-time waste detection and automated cleaning.
- **Personal Website Portfolio** – Responsive **React + Tailwind** web app deployed on Vercel with CRUD via localStorage.

ENGINEERING & AI PROJECTS

- **Line Follower Robot** – Microcontroller-based robot with IR sensors for autonomous navigation.
- **Doorlock System with Custom PCB** – Arduino-powered electronic lock with **RFID + keypad authentication**, designed on a custom PCB.
- **Smart Cat Litter Box (Thesis)** – Computer vision system using **Python, OpenCV, and YOLOv11** for waste detection, integrated with automated hardware cleaning.

CERTIFICATIONS

- **IT Customer Support Basics**
- **Networking Basics**
- **MySQL from scratch for Data Science and Analytics**
- **Foundations of Cybersecurity**
- **Introduction to CRM with Hubspot**
- **Getting started with Google Workspace**
- **Introduction to Laravel**
- **Step-by-Step guide to Image Classification**

TECHNICAL SKILLS

- **Programming languages:** CSS, JavaScript, PHP, Dart, C++, Java, VB.NET, Python
- **CMS/Frameworks:** WordPress, Shopify, HTML, Elementor Pro, Gutenberg, PrestaShop, WooCommerce, Laravel, React, Flutter
- **Databases & Backend:** MySQL, Firebase, PostgreSQL, superbase, firebase
- **Dev Tools:** Git, GitHub, VS Code, XAMPP, WAMP, DevC++, NetBeans
- **API's Testing** - Postman
- **CRM Tools:** Zoho CRM, HubSpot CRM
- **AI Tools**: ChatGPT, Claude, GitHub Copilot, Cursor, Codeium
- **Automation Tools:** Zapier, Custom python script, SuitScript, N8N, Manychat, GHL

SKILLS & INTEREST

- Problem-solving, teamwork, adaptability, client collaboration.
- Interests: Chess, Video Games, Camping, Meditation
